

ODITYA ANDALAS PUTRA

(+62)89618447592 | oditya.saputra74@gmail.com | www.linkedin.com/in/odityaandalasputra/ | https://bit.ly/portosertif_oditya
Malang, Indonesia

I'm a fresh graduate in Electrical Engineering (2025) with an interest in automation, IoT, and control systems. I've worked on several projects and internships related to system integration, real-time monitoring, and embedded systems. I'm comfortable working with microcontrollers, PLC, and basic data processing, and I enjoy building systems that combine hardware and software. During college, I also led a robotics research team, which helped me improve my teamwork and leadership skills. I also had experience working in an IoT team supporting operational systems, where I learned how technology is applied in real industrial environments. I'm looking for an opportunity where I can keep learning, gain real experience, and contribute to improving system performance and efficiency.

Work Experiences

PT Mitra Talenta Grup– Jakarta Timur, Indonesia Aug 2025 – Present

IoT Engineer

PT Mitra Talenta Grup is a technical service and human resource management company partnering with PT Pama Persada Nusantara (PAMA) one of Indonesia's largest mining contractors under the Astra Group. The company provides expert support in information technology, telecommunications, and Internet of Things (IoT).

- Led the development and monitoring of 3 IoT projects across multiple mining sites, ensuring safety and efficiency by integrating IoT devices and real-time dashboards, while optimizing operations and hardware durability for seamless integration.
- Optimized data flow and system performance, improving the integration between IoT devices and dashboards to provide better real-time insights and faster incident resolution, while collaborating with cross-functional teams to enhance incident management processes.
- Completed the design and development of custom PCB and 3D enclosures ensuring hardware durability, optimal performance for IoT-based systems.

JC Corporate - Batu, Indonesia Sep 2024 - Dec 2024

Electrical Engineer Internship

JC Corporate is a company established in 2019, operating in the hospitality sector with a focus on managing and developing services oriented towards customer satisfaction.

- Repairing PLC systems in freight elevator panels and Water Level Control systems, as well as analyzing power panel failures in the pumproom.
- Maintained 7 Mechanical and Electrical (M&E) Rooms responsible for water automation, electrical systems, and internet network management.
- Acquired knowledge of both local and international electrical regulations applicable to technical hotel infrastructure.

Spektrum Teknologi - Malang, Indonesia Jun 2024 - Aug 2024

Embedded Systems Engineer Internship

Spektrum Teknologi is a technology company that provides services in the fields of IoT, Robotics, Agricultural Technology, and Renewable Energy.

- Organizing and contributing to 4 major project works, including the design of an IoT-based Smart Composting tool, an Autonomous Line Follower Robot, and a human detection system using YOLOv11, as well as developing a PLC-based lift trainer for educational.
- Served as an embedded systems instructor for 10 vocational high school students in preparation for robotic competitions.
- Achieved a gold medal at the International Innovation and Invention Competition held at Universiti Tun Hussein Onn Malaysia, showcasing the IoT-based Smart Composting system.

STECHOQ Robotika Indonesia - Sleman Regency Indonesia Jan 2024 - Jun 2024

Engineer internship

Stechoq is an R&D company focused on developing innovative products in robotics and Industry 4.0. It was founded in 2015 by accomplished millennials who have achieved numerous accolades in the field of robotics both domestically and internationally.

- The development of autonomous vehicle systems involves a deeper understanding of the principles of robotics, navigation, and control necessary for designing and building Automated Guided Vehicles (AGVs).
- Analyzing machine elements, methods for maintaining machine components, and differentiating between the types of sensors and actuators used in the industry.
- Appointed as team leader and received a nomination for the Best Final Project Team out of 10 teams for the design and development of an Automated Guided Vehicle (AGV) for manufacturing distribution.

Education

Universitas Negeri Malang - Malang, Indonesia Aug 2021 - Jan 2025

Bachelor of Electrical Engineering, 3.69/4.00

- Concentrated in control systems, achieving 149 credits over 3.5 years.
- Served as a laboratory assistant for analog and digital electronics, responsible for assisting 4 classes with a total of 125 students.
- Participated in the 8th International Conference on Electrical, Electronics, and Information Engineering (ICEEIE) organized by the Department of Electrical Engineering and Informatics.

Organizational experience

Dewantara Research Team - Universitas Negeri Malang

Aug 2023 - Sep 2024

Chairperson of the Organization

The Dewantara Research Team is an organization operating under the Department of Electrical Engineering and Information Technology at the Faculty of Engineering, Universitas Negeri Malang. It has been involved in robotics and control systems research since 2006.

- Coordinated all work programs and research activities for each division head and relevant members.
- Organized a basic electronics and programming internship program attended by 90 participants over the course of one month.
- Led 4 divisions to become finalists in the 2024 Indonesian Robot Contest (KRI) held at UMS, Surakarta.

Indonesian Underwater Robot Contest - Universitas Negeri Malang

Jan 2024 - Jul 2024

Head of Mechanical Division

KRI 2024 is the Indonesian Robot Contest, an annual competition held for university students in the field of robotic design and engineering. The focus is on the Indonesian Underwater Robot Contest, where participants design and develop an Autonomous Underwater Robot (AUR).

- Managed mechanical research for the underwater robot team, designing a waterproof and efficiently submersible robot.
- Qualified as one of the 14 national finalist teams out of 55 teams from universities across Indonesia.
- Produced research publications in the form of an international conference journal and a SINTA 5-accredited journal.

Workshop Elektro (LTDC2022) - Universitas Negeri Malang

Oct 2022 - Feb 2023

Technical Coordinator

The Line Tracer Design and Contest National 2022 (LTDC) is a line follower robot competition, featuring both analog and microcontroller-based categories. It is organized by the Electrical Engineering Workshop and is open to university students and the general public.

- Planned competition rules and served as a referee during the event.
- Assisted 60 analog line follower teams and 45 microcontroller-based line follower teams from universities across Indonesia.

Skills, Awards and Competition

- **Copyright** (2021): (000537114) Hak Kekayaan Intelektual "Implementasi Inverse Kinematik Pada Desain Robot SAR Berbasis Arduino guna sebagai Kendali Manuver Gerak Robot"
- **Studied Hardware and other:** JetsonNANO, Raspbery Pi, Arduino, STM32, ESP32, ESP8266, PLC Mitsubishi, PLC Omron, Pneumatic.
- **Studied software and PL:** Cx Programmer, GX Works 2, Ms Office, ArduinoIDE, STM32CubeIDE, Visual Studio Code, OpenCV, EasyEda, Solidwork, Blender, Fusion360, Photoshop, CorelDraw, Movavi, Adobe Premiere
- **Achievements** v(2025): Completed Course of: "PLC Programming Basics (PLC Mitshubishi Study Case Using GX Works 2)" Delivered By: Aldo Rahmad Ageng (Control System Engineer at Tech Company)
- **Achievements** (2024): Gold Medal in the International Innovation and Invention Competition, in the Agrotechnology category. (2024, Universiti Tun Hussein Onn Malaysia).
- **Achievements** v(2024): Cisco Introduction to the Internet of Things Course Certificate, awarded for successfully completing the introductory course on the Internet of Things.
- **Achievements** (2024): Finalist in the Indonesian Underwater Robot Contest, part of Kontes Robot Indonesia (KRI 2024), held at Universitas Muhammadiyah Surakarta.
- **Achievements** (2023): 1st Place in the National Student Organization Smart Technology Innovation Competition, in the Implementation category, LINTAS ORMAWA (2023, Malang).
- **Achievements** (2023): Team Leader of HEXA CAKRAWALA, a finalist in the SAR Robot Contest organized by Kontes Robot Indonesia (KRI 2023), held at USM-Semarang.
- **Achievements** (2023): Finalist in the 18th Digital Signal Processing Creative Design Contest (2023, Southern Taiwan University of Science Technology (STUST))
- **Projects** (2024): Designed an Autonomous Guided Vehicle (AGV) based on Jetson Nano with lidar localization method for optimizing goods distribution in the manufacturing industry.
- **Projects** (2024): Project on the Development of an Omron PLC Program for Dolang Automation & PLC GX2 for Mitsubishi FX3U PLC.
- **Projects** (2024): Developed an IoT-based compost monitoring device integrated with machine learning, aimed at improving the composting process by predicting maturity and monitoring gas emissions.
- **Language:** Bahasa Indonesia, English (Pre Advanced)
- **Soft Skills:** Leadership, Problem Solving, Communication, Public Speaking, Team Work.
- **Publication** (2023): Putra, O.A., Hidayat, A.Y.F., Setiawan, A., n.d. Implementation of Inverse Kinematics on Arduino-Based SAR Robot Leg Design as a Control for Robot Motion Maneuverability.
